

Decoration

Non-Visible component

Category	Requires	Version
Utilities	API 19, Android 4.4 - 4.4.4 KitKat	1

Overview

A non-visible component that modifies other components' padding, margins, and other visual properties.

Methods

Set Margin

Margin is a way for a component to enforce some distance from others components. By specifying margin for a component, we say that keep this much distance from this component.

Params	
component	Component
values	Text

Set Padding

The padding around the component. Padding is the space inside the border, between the border and the actual component content. Use single number like 5 to specify padding for top, left, bottom, right. You can also use 4 different numbers like 5,0,10,0 for top, left, bottom right.

Params	
component	Component
values	Text

Set Shape

This block allows you to create a rectangle or round shape for the visible component. You can use Color for backgroundColor and borderColor.

Params	
component	Component
background Color	Number
border Color	Number
is Round	Boolean
