! Deprecated

Returns: *Text*

This block is deprecated and will be removed soon. Use instead 'Get String From Asset' or 'Get String From Path'.

Params	
resource Name	Text
if Resource Not Found Use	Text

Get String From Asset

Returns: *Text*

Get the text from a asset resource file. Make sure you uploaded a file at 'Resource File From Asset' property.

Params	
resource Name	Text
if Resource Not Found Use	Text

Get String From Path

Returns: *Text*

Get the text from a path resource file. Make sure you added a file path at 'Resource File From Path' property. The path can be too a link to a url.

Params	
resource Name	Text
if Resource Not Found Use	Text

Properties

Resource File From Asset

Text — Read Write - Designer Blocks

Set the file which is used as resource file. The file must be stored in the assets folder.

Resource File From Path

Text — **Read** **Write** - **Designer** **Blocks**

Set the file which is used as resource file. The file path must be valid to any file you want to use. The path can be too a link to a url.
