Methods

Is European User

Returns: *Boolean*

Returns true if the current app user is located in europe. If true you must ask the user as example in a dialog if he give his consent for personalized ads.

Load Ad

Loads a new ad.

Show Ad

Shows an ad to the user.

Properties

SDK Key

Text — Write - Designer

Test Mode

Boolean Default: *False* — Read Write - Designer Blocks

If you want to test the component then that this property to true. Then you will receive test ads.

User Consent

Boolean — Read Write - Blocks

If set to true the user allowed the ad network to show personalized ads. You only need to request the consent from european users.
