

# Custom Tabs

Non-Visible component

Category	Requires	Version
Experimental	API 19, Android 4.4 - 4.4.4 KitKat	2

## Overview

A non-visible component that opens web pages as custom tabs on Google Chrome.

## Methods

### Add Menu Item Open App

Use this block to add a menu item with the given title to open any app you want with the package name. The package name can be as example 'com.instagram.android' to open Instagram on the menu item click. If the app is not installed the menu item will not be added.

Params	
title	Text
package Name	Text

### Add Menu Item Open Page

Use this block to add a menu item with the given title and page link. The page can be as example 'https://www.instagram.com/kodular/'. If the user have

Instagram installed,the page will then be opened in the official Instagram app.  
Else in the default browser.

Params	
title	Text
page	Text
