Properties

Saved Recording

Text Default: */mnt/sdcard/Makeroid/mySound.3gp* — Read Write -
Designer Blocks

Specifies the path to the file where the recording should be stored. If this property is the empty string, then starting a recording will create a file in an appropriate location. If the property is not the empty string, it should specify a complete path to a file in an existing directory, including a file name with the extension .3gp.
